

ABOUT ME

Product Owner and Application Developer at T.C.C Technology Group since 2024, working both sides of product delivery: owning a backlog and handling frontline customer service, and building the web apps, LINE Mini Apps, and automation behind it. BSc in Computer Science, Chiang Mai University.

SKILLS

- Programming:** Python, JavaScript, SQL, C, C++, Java, PHP, Ruby, Go
- Web Development:** React, HTML, CSS, Tailwind CSS, Flask, Bootstrap, Vite
- Data Analysis:** Pandas, NumPy, Scikit-learn, Matplotlib, Power BI, Excel / Google Sheets
- Databases:** MySQL, PostgreSQL
- Tools:** Git, Playwright, LINE API, Google Apps Script
- Video Editing:** CapCut

COMMUNICATION

- Thai:** Native
- English:** Good reading and writing, conversational speaking
- Gather requirements during store visits
 - Report findings to executives
 - Create training materials and presentations

SOFT SKILLS

- Leadership
- Negotiation
- Critical Thinking
- Creativity
- Management
- Digital Marketing

EXPERIENCE

Product Owner

2024 – Present

T.C.C Technology Group

- Own the product backlog for a retail commerce platform: gather requirements on store visits, turn meeting notes into prioritized backlog items, and report findings to executives.
- Handle customer service directly, answering questions from store staff and customers and feeding recurring issues back into the roadmap.
- Create training materials and presentations that explain new features in plain language.
- Define acceptance criteria, work with developers through delivery, and follow up on site to confirm features solve the real problem.

Application Developer

2024 – Present

T.C.C Technology Group

- Implement the requirements assigned to me, from web applications to LINE Mini Apps and chatbots used by real customers.
- Developed React frontends and connected them to backend services, APIs, and databases.
- Automated manual work in Python, including price tracking across retailers and order handling via Google Sheets.
- Debugged and improved live features based on staff and customer feedback.

SELECTED PROJECTS

Retail Price Comparison Bot

Tracks prices across Makro PRO, Lotus's, and Big C using Playwright with persistent browser sessions and network interception. Matches Thai product names with trigram-based fuzzy matching and compares prices strictly unit-for-unit.

Playwright · Web Scraping · Fuzzy Matching

LINE Mini App

Built a LINE Mini App with geofencing to detect users in the Bangkok metro area, PDPA consent recording, and a deep-link flow that sends customers to Shopee.

LINE Mini App · Geofencing · PDPA

Rayong Botanical Garden Web App & Chatbot

Team project delivered to a provincial botanical garden and now in real use. The React chatbot answers visitor questions from a curated database, and geolocation helps visitors orient themselves on site. I designed the web interface and built the chatbot's database.

React · Chatbot · Geolocation · Database

LINE Chatbot for Beverage Shop

Cuts the time staff spend writing orders: it records orders in Google Sheets and messages customers automatically when an order is ready. Built the backend, frontend, and dashboard, and connected the LINE API.

JavaScript · LINE API · Google Sheets · Dashboard

US Stock Screener & Backtester

Screens US stocks for bullish candlestick patterns with confluence filters, backtested across 200,000+ trades, with a React dashboard for market regime assessment.

Python · React · Backtesting

EDUCATION

Chiang Mai University

Graduated 2026

Bachelor of Science in Computer Science

Relevant coursework: System Analysis and Design, AI Development, Database Management, Data Analysis, Data Mining, Marketing Analysis, Web Application Development, Object-Oriented Programming

AWARDS

Honorable Mention Award, Faculty of Science Project
